Confirmation about the cooperation on the biomass sector in Korea

Dear Sir or madam,

Hereby we confirm, that we are currently cooperating with DAEYOUNG BIO ENERGY CO., LTD., Korea in identifying and developing biomass boiler projects on the Korean market. The target is to install several boiler plants, manufactured by POLYTECHNIK, in the range 2- 15 MW thermal capacity. The feedstock for these boiler plants will be pellets, made by DAEYOUNG BIO ENERGY CO., LTD on locally sourced agricultural residues, which therefore would fully comply with the principles of sustainability.

Best regards

Bernhard Häusler
(Sales Manager)
